TESTIMONIALS

The system offers a number of advantages...

1. We receive the full amount without any losses due to bank charges or currency changes.
2. The payment is received in our account within 48 hours (at most).
3. We have full traceability of funds.
4. We can issue letters of receipt much quicker thereby improving the quality of service to the student.

I am happy to recommend the service.

Dr. Robert Flood

I must say that the service is a very useful international payment tool for agents that save time and money. All payments made using their system are transferred about 48 hours. When using the highly priced services offered by the local banks it used to take 5 to 7 working days for the money to be credited into the account of our partner schools abroad. So, I am happy to recommend the service.

Our experience with the service has been very positive. The system is very user-friendly and the support service is excellent. Due to instant payment confirmation payments are easy to track. Most importantly, INTERNeX and its clients save a significant amount on international wire transfer fees. We can highly recommend the service.

I believe the foreign exchange rates our students receive are very competitive, and we are enjoying not having to pay to receive international payments. The PaytoStudy service ensures we receive exact amounts, whilst ensuring that we can easily identify and allocate all such receipts.

I do not hesitate in recommending the PaytoStudy service to our international students, and would also recommend anyone in the sector wishing to improve the speed, cost and efficiency of the way they receive payments from international students, to take a look at what PaytoStudy can do to help them....they've certainly helped us.
